<sup>1</sup> Place a checkmark in the box next to the results you would like to have displayed in the Public Results area of the website www.bovigen.com. To have these results displayed you must sign at end of this form and check the animals to be displayed and fax form to the number at the bottom of the page.

<sup>2</sup> GPDs<sup>™</sup> (genetic progeny differences) are a logical, simple calculation used to describe the actual genetic makeup of the animal and the true eff of each allele, or combination of alleles within the trait. The unit of measure for Tenderness is Pounds of Warner Bratzler Shear Force, so a lower number is better. The unit of measure for Quality Grade is Percentage likelihood of grading Choice or Better, so a higher number is better.
